

Wheel Shark™ Presses

WHEEL SHARK™

Wheel Shark™ Presses are niche products for military and industrial strength wheeled systems. Wheel Shark™ Presses

consistently and significantly reduce time and manpower to get the job done.

MADE IN THE USA –

All our products are built at our manufacturing facilities in Bradenton Florida. Our products are built to last and we stand behind each press with a warranty and our commitment to support your mission.

HORIZONTAL RUN FLAT TIRE PRESS –

Easily insert and extract run flats from military and commercial tires. This press exerts 8,000 lbs of hydraulic cylinder force and operates with 2,200 PSI hydraulic pressure.

HEAVY DUTY HORIZONTAL RUN FLAT TIRE PRESS –

Insert and extract run flats from the

largest military and commercial wheeled systems. This press exerts 18,000 lbs of hydraulic cylinder force and operates with 2,800 PSI hydraulic pressure.

VERTICAL RUN FLAT TIRE PRESS –

This run flat insertion and extraction press is designed to operate vertically to conserve space. Run flats and tires are mounted using an elevator.

SCISSORS WHEEL COMPRESSION TABLE –

This machine compresses two piece bolt together wheels or three piece split rim wheels so operators can install lock ring on split rim wheels or install nuts on bolt together wheels.
