

Wheel Systems International, Inc., (WSI)

WSI manufactures and supplies a variety of products and services to support the military and commercial wheeled vehicle industry. We have been awarded US government contracts annually since 2002. Here are some of the specialty solutions in which we excel. >

RUN FLAT TIRE PRESSES –

We are a leader in providing heavy duty tire presses used to extract and insert run flat units in the largest military wheeled systems. In addition to manufacturing the presses, we also offer service contracts to change out run flats and other tire maintenance services.

CENTRAL TIRE INFLATION SYSTEM (CTIS) –

We have developed a CTIS for Tactical Wheeled Vehicles, Combat Vehicles and Commercial Vehicles. Our Wheel Valve is as close as you can get to self-cleaning. We integrate our air passageway through the web of the wheel or on the outside of the wheel.

TRAILERS –

We partner with several trailer OEMs to provide custom military trailer configurations for specialty equipment.

ISO CONTAINERS –

We design and manufacture air transportable ISO Containers, which expand into 8'H x 20'W x 24'L Workshop Shelters. We build containers in a variety of configurations, Quad-Con, Tri-Con, Bi-Con, and 20' & 40' and more. Our shelters are designed for Auto Repair Centers, Communication Centers, Tire Repair Centers, Weapons Repair Centers, and Tactical Operations Centers, etc.

TOOLS & SUPPLIES –

We have fulfilled several US government contracts for collections of specialized and diverse tools and supplies. Our logistical specialists can procure any volume of custom and off-the-shelf products, and deliver them anywhere in the world.
